

To: Connecticut lawmakers/Environment Committee

I am writing to express my support for a ban on fracking waste in Connecticut. We have all the skill, knowledge and technology right now to fulfill our energy needs with renewables. We don't need to put our drinking water at risk for a limited amount of fossil fuel. Rather, we need legislation that will discourage fossil fuels and encourage clean energy. Please vote to protect this beautiful and precious place where we live.

Sincerely,

Kevin Ireton
